Manned Mars Plan: Phobos by 2033, Martian Surface by 2039? An incremental, multiple-mission approach that envisions getting astronauts to Phobos by 2033, then down to the Martian surface by 2039 could make manned Mars exploration technologically and economically feasible, said Firouz Naderi, head of the Solar System Exploration Directorate at NASA's Jet Propulsion Laboratory in Pasadena, California. Manned Mars Mission: How NASA Could Do It - Space.com Going through Phobos. Sending astronauts to Mars is the top long-term priority of NASA's human-spaceflight program. Mission to Phobos " The precursor to human Mars landing ... "A human Mars Orbit/Phobos Mission represents an intermediate step between human exploration missions in near-Earth space and human missions to explore the surface of Mars," noted the expansive section on the manned missions to Mars/Phobos in the expansive " yet unpublished " presentation (available to download on L2.

Phobos As First Pit Stop In Manned Mars Exploration - Forbes Phobos " the enigmatic, oddly-shaped Martian moon " could serve as an eventual pit stop for human missions to the Red Planet. That's, of course, contingent on future Mars exploration strategies. Phobos (moon) - Wikipedia Phobos has also been proposed as an early target for a manned mission to Mars because a landing on Phobos would be considerably less difficult and expensive than a landing on the surface of Mars itself. Phobos Surveyor - WikiMili, The Free Encyclopedia The mission could be a Discovery-class mission, [5] and could be beneficial to the future manned space program by investigating the low-gravity Phobos's suitability for a manned base before the construction of one on Mars itself [6] and where on the moon landing sites for manned missions should be. [4].

Phobos Manned Mission by Joni M. Fisher - goodreads.com The science fiction novel Phobos: Manned Mission explores the basic cycle of emotions that drive scientific discovery--curiosity, pride, and fear--through the example of five astronauts in their fifties sent to recover an alien artifact found on Mars. Mankind's curiosity demands the mission; pride endangers it; fear dominates it. Why We Should Land on Phobos Before We Land on Mars In this way, a Phobos mission could test technologies for a big manned landing on the planet. It also provides a way to put boots on solid ground without extraordinary fuel requirements to return. Phobos program - Wikipedia The Phobos (Russian: Фобос, Fobos, Greek: Φόβος, Fobos) program was an unmanned space mission consisting of two probes launched by the Soviet Union to study Mars and its moons Phobos and Deimos. Phobos 1 was launched on 7 July 1988, and Phobos 2 on 12 July 1988, each aboard a Proton-K rocket.

MANNED MARS EXPLORER PROJECT - NASA The Manned Mars Explorer study had two primary objectives: 1) to develop a mission scenario to deliver a crew of six to the vicinity of Mars; and 2) to conceptualize a transportation system to accomplish this mission.
